

Retail

Modular units designed to cover the natural juice demand in megastores. The Zummo Retail range includes juicers, cabinets, dispensers and specialised accessories that can be combined to offer the most adequate solution for every space.

Profitability in juice extraction, intuitive use and simple maintenance. These are the key points that make Zummo Retail the best option to make your business grow.

Z40 ONE

Cabinet Store Plus

When simplicity is transformed into maximum productivity.

One is simplicity, is uniqueness. Z40 One means to optimize the squeezing when it is part of very well-defined and unchanging processes, and where the time of operation is very important. Fixed gauges, less pieces and simpler movements for the operator are fundamental to achieve it.

Efficiently squeeze juice

1. EVS®Advanced

Unique vertical juice extraction system; a Zummo exclusive. Based on manual juice extraction system it achieves maximum profitability, obtaining the purest possible juice with the greatest operational functionality.

2. Juiceextraction kit

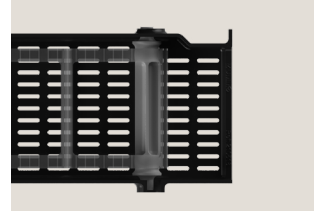

The M kit, standard with the machine, can be complemented with the L kit (accessory) for larger citrus fruits. Squeezing kits count with the SimpleClick anchorage system, by which the balls are fixed with clip system, reducing the number of assembly parts, making it easier and faster.

Juice extraction kit

3. Automatic filter

Comprised of a belt that starts to move when the juice extraction starts up, sweeping away the seeds and pulp that remain in the filter: greater juice extraction performance and greater autonomy.

Automatic filter

4. Adapt tray

Dual-position tap developed in the shape of a swing lever to optimise usability. Its exclusive Zummo design drains all the juice out, preventing it from accumulating in the base, and therefore maximising hygiene and juice purity.

Adapt tray

4. Advanced feeder

New feeder designed in a single piece without the need of using nuts or edges. This translates into greater ease of handling and cleaning, key to minimizing machine maintenance times. It also maximizes the machine's autonomy since its design avoids fruit jamming and blocking of the machine.

Advanced feeder

Technical features

Fruits per minute	40
Cosumption	450 W
Bin capacity	100 l (2 x 50 l)
Squeezing kits	M (60-76 mm)/Opc: L(64-85mm)
Dimensions	800 (x) x 1762 (y) x 600(z) mm
Safety	Blocking sensors
Basket capacity	20 kg without door/ Opt: 30 kg
Programmer	Yes
